CAPABILITY STATEMENT 2025

COMPANY OVERVIEW

Defence Seals & Spares is Australia's leading supplier of military grade components required for both new build acquisition and through life sustainment of all defence platforms and systems. The onsite manufacturing of vulcanised orings strengthens our ability to supply efficiently and competitively. With over 20 years of industry expertise, we have developed a deep understanding of the critical importance of defence industry OQE requirements and on time delivery.

Our experienced team manages both procurement and manufacturing, delivering agile responses and consistently meeting strict quality requirements. We have extensive knowledge and a network of supply chain partners assisting in the sourcing of obsolete and hard to find items.

Supported by ISO 9001 certification, we maintain strict quality standards, ensuring all components meet our customers' specifications.

Defence Seals & Spares excels in military grade procurement, supporting the defence industry with unmatched quality and responsive, on time delivery.

OUR PURPOSE

Defence Seals & Spares is committed to delivering on time, mission critical supplies to support Australia's defence infrastructure nationwide.

At Defence Seals & Spares, our purpose is to empower Australia's defence force by ensuring seamless access to mission critical components and solutions. We deliver certainty in the face of complexity, combining innovative manufacturing capabilities with a thorough understanding of defence requirements.

Our focus extends beyond supply, we act as a strategic partner, streamlining procurement processes and solving supply chain challenges. Through collaboration, adaptability and cutting edge precision, we are more than just a supplier, we are a trusted ally in the Australian defence industry.

*Empowering defence with precision solutions, **seamless supply and innovative manufacturing for Australia's operational success.***

ACCREDITATIONS AND EXPERTISE

Defence Seals & Spares integrates over 20 years of specialised experience with industry recognised certifications and memberships. Our capabilities reflect a deep understanding of defence standards, enabling us to deliver precise, reliable solutions tailored to operational demands.

With ISO 9001 and DISP certifications, we maintain rigorous quality assurance across procurement and manufacturing. Strong affiliations and a trusted supplier network empower us to address complex challenges effectively, ensuring Australian defence platforms remain supported by expertly sourced and produced components.

- ✓ MacLellan Rubber Australian Agent
- ✓ Parker Distributor
- ✓ Loctite Reseller

*Demonstrating a strong commitment to quality and industry standards, **Defence Seals & Spares maintains essential certifications and affiliations, ensuring reliable supply.***

PROCUREMENT SERVICES

Defence Seals & Spares provides accurate procurement of critical seals and spares for defence applications. Our services cover a diverse range of materials and products, such as military specification rubber compounds, specialised alloy components, electrical items, filters and gauges. With rigorous quality checks and a trusted domestic and international supplier network, we ensure timely and efficient delivery, maintaining operational readiness for all defence platforms.

→ QUALITY CONTROL

Every component undergoes detailed quality checks, often through use of the Planar 70.20 optical measurement machine, ensuring accuracy to within 12 microns. Our meticulous quality process confirms each component meets the stringent defence specifications required by our customers.

→ EFFICIENT LOGISTICS AND DELIVERY

Using an established logistics network, we achieve nationwide, timely delivery of every order. This capability supports seamless operations and rapid response times for our defence clients across Australia.

→ RARE COMPONENT SOURCING

Our proven excellence in sourcing obsolete and specialised components compliments our extensive domestic and international supplier network, ensuring we can fulfil complex and unique defence requirements promptly and reliably.

MANUFACTURING SERVICES

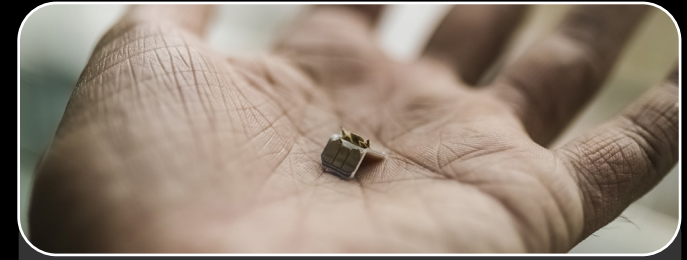

Defence Seals & Spares strengthens defence operations through domestic production of vulcanised orings and seals. Domestic manufacturing supports supply chain stability, reduces lead times and ensures stringent quality control. All production processes align with defence industry standards, enabling reliable and responsive service tailored to mission critical requirements.

*Delivering military grade manufacturing in Australia, Defence Seals & Spares ensures reliable supply, **reduced lead times and rigorous quality standards to support mission critical operations.***

→ ON-SHORE PRODUCTION

Our Australian-based manufacturing delivers military grade vulcanised orings and seals, ensuring reliable and consistent availability and alignment with defence industry standards. As a result, urgent operational demands are supported with sovereign supply.

→ CONSISTENT QUALITY CONTROL

Every stage of production and procurement is subject to rigorous quality checks, adhering strictly to defence requirements. Our Quality Control processes ensure reliability of product that is fit for mission critical applications.

→ REDUCED LEAD TIMES

Australian manufacturing shortens delivery timelines, ensuring defence clients can access essential components efficiently. This approach supports operational stability, reducing reliance on international sourcing.

→ COMPLIANCE WITH DEFENCE STANDARDS

Our manufacturing and procurement operations adhere to ISO certified practices and defence industry standards, ensuring each product meets stringent defence requirements. This commitment strengthens trust and reliability for every order, ensuring that customers can depend on consistent, high quality service with each transaction.

OUR CLIENTS

Defence Seals & Spares is a trusted supplier for Australia's defence industry, delivering high quality components essential to the operational readiness of major defence platforms.

Supporting both new build and ongoing sustainment, we have built strong relationships with our clients through consistent, on time deliveries and an unwavering commitment to stringent quality standards. Our clients rely on us to meet the specific demands of mission critical projects with precision and reliability.

Defence Seals & Spares supports Australia's defence industry with on time supply of military grade components, ensuring operational readiness and seamless support for Australian Defence Force ships, submarines, aircraft and land vehicles.
