

Defence Seals & Spares supports Australian defence operations through reliable procurement and onshore manufacturing, delivering high quality, compliant components and supply solutions for mission critical readiness.

CAPABILITIES

- Sources hard to find and obsolete specialty seals, orings and certified maintenance parts from trusted domestic and international OEMs.
- Manufactures custom vulcanised orings and seals with onshore reliability to support unique operational requirements.

- Ensures precise quality control with measurement accuracy within 12 microns, utilising the advanced Planar 70.20 optical measurement machine.
- Delivers essential components and spare parts across Australia, maintaining ISO certified processes for defence compliance. Our experienced team manages both procurement and manufacturing, delivering agile responses and consistently meeting strict quality requirements. We have extensive knowledge and a global network of supply chain partners for the sourcing of obsolete and hard to find items.
- Supported by ISO 9001 certification, we maintain strict quality standards, ensuring all components meet our customers' specifications.

DIFFERENTIATORS

- Australian owned and operated, delivering defence ready solutions with agility and responsiveness.
- DISP certified, ensuring alignment with defence standards and requirements.
- Prioritises quality of service, focusing on mission critical, certified components for defence platforms.
- Built for adaptability, meeting the unique needs of the Australian Defence Force with precision.
